# Occupational Therapist Sensory Specialist

We're looking for an Occupational Therapist with a sensory integration background to support children and adolescents with mental health, neurodevelopmental, and sensory processing needs.

### What You'll Do

- Assess sensory processing, emotional regulation, and daily functioning
- Design and deliver therapy plans covering sensory integration, routines, and independence
- Support children with anxiety, ADHD, autism, and trauma-related needs
- Work with families on home strategies and schools on classroom adjustments
- Contribute to multidisciplinary team meetings and care planning

### What We're Looking For

- Degree in Occupational Therapy from an accredited institution
- Holding a valid DHA licence as an Occupational Therapist
- 2–5+ years' experience with children in mental health or neurodevelopmental settings
- Training in sensory integration or sensory processing approaches, ideally with postgraduate certification
- Strong report-writing and communication skills

### Nice to Have

- Experience delivering parent training or group-based interventions
- Arabic language skills
